## AFTERCARE

# Tattoo Aftercare

How to heal your new tattoo — read it, follow it, and call us with any questions.

## 01 The first few hours

- Remove your bandage after a minimum of two hours.
- Wash your hands, then wash your tattoo thoroughly with an unscented liquid soap and warm water. **Do not scrub the tattoo.**

## 02 Days 1–3

- After rinsing, pat it dry with a paper towel. Wait a few minutes for it to fully dry, then apply a very small amount of A&D or Aquaphor with clean hands. Thoroughly work it into the skin — **the tattoo should not look wet.**
- Do this 2–3 times a day for 3 days. **Do not re-bandage.**

## 03 After day 3

- Continue to apply unscented body lotion 2–3 times a day for a total of 2–3 weeks.
- Healing is complete once the tattoo no longer looks dry and flaky.

## 04 For 2–3 weeks

- Do not pick or scratch the tattoo.
- Do not expose the tattoo to prolonged sunlight.
- Do not submerge the tattoo in water. Getting the tattoo wet in the shower is fine, but no baths, swimming or splashing in the ocean.

**If you have any questions, call us — not your friends.**
